

EXPANSE

MODULAR CABINET
& JOINERY SYSTEM

EXPANSE

Achieve the built-in look without the built-in price tag...

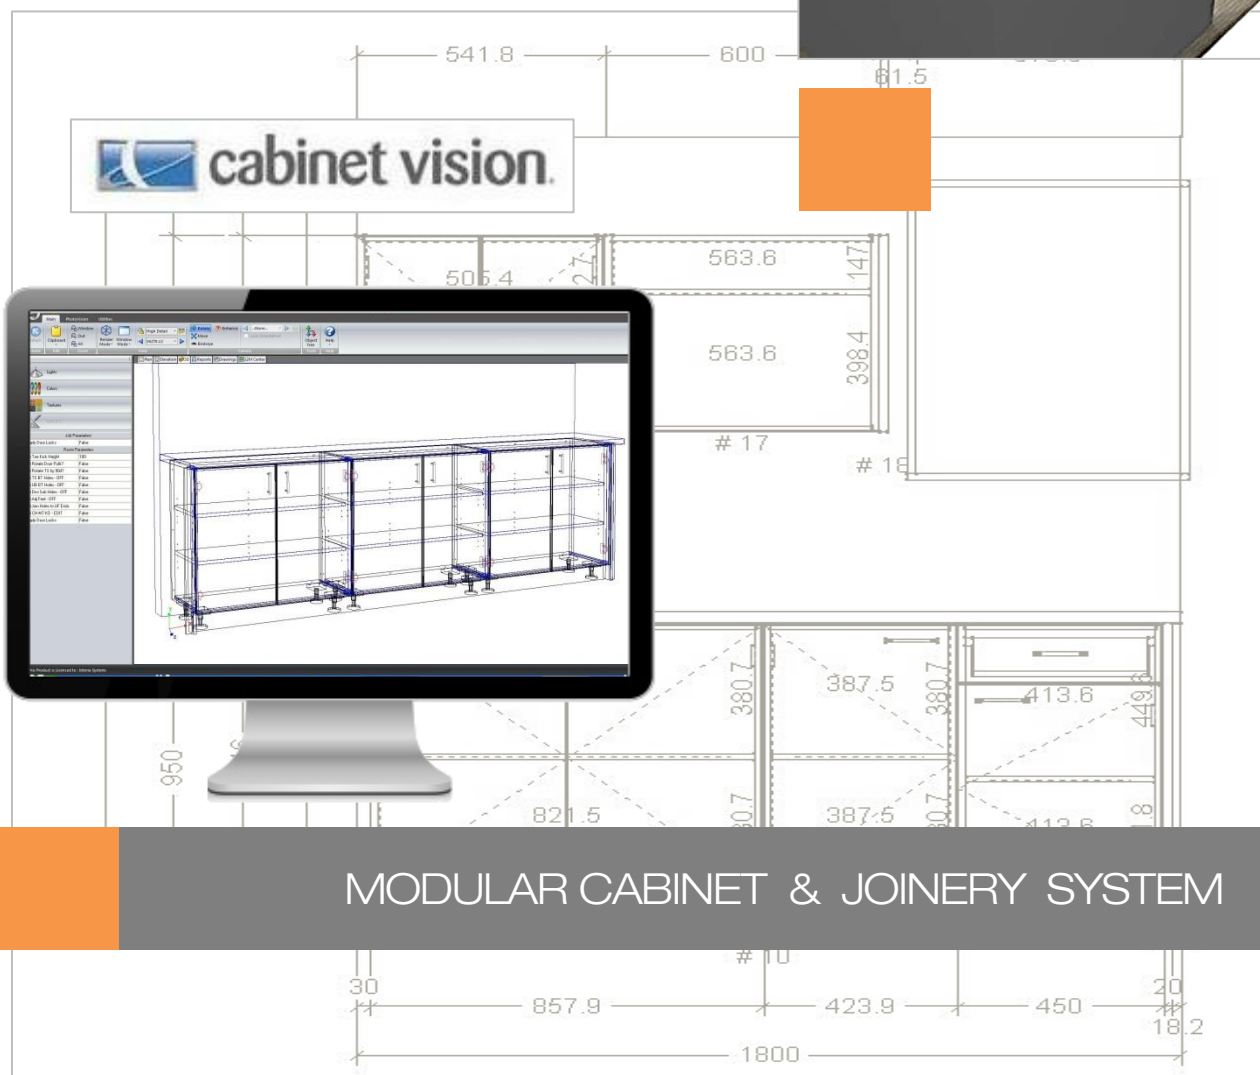

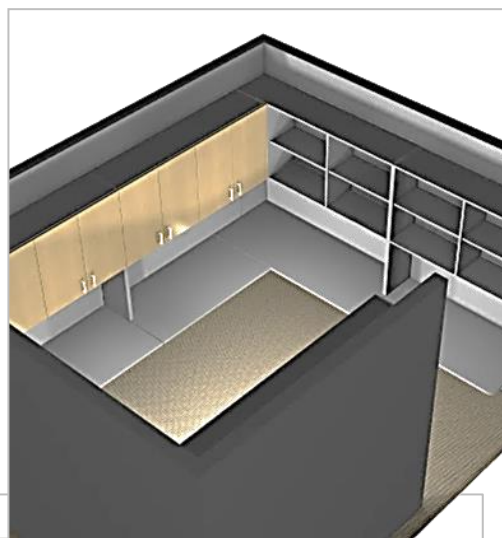

With the Expanse system, you can now specify a semi built-in customisable cabinet system that is easily installed with minimum onsite time and disruption.

Choose from a large array of units and configure them into the layout of your choice, then alter the sizing to suit your available space.

Expanse can be finished in most of today's designer finishes and can incorporate your choice of board substrate, handle design and a myriad of options including locking and worktop styles.

The one-piece kick-board completes the integrated look and units can also be configured back-to-back to form island benching.

Expanse is designed & created with Cabinetvision Screen-to-machine software...offering extreme precision & quality with exceptional value-for-money...
