PRESTIO 60/32

Screen System

PRESTIO 60/32 System

Interia Systems' Prestio60/32 screen system is a cost-effective and totally flexible way to configure your office facility and is available in two panel thicknesses, 60mm and 32mm, which perfectly integrate together.

Prestio is extremely stable and versatile and can be easily demounted, relocated and reconfigured at a later stage should your requirements change.

With evolving modern working styles demanding integrated support for communications, Prestio discreetly accommodates power and data requirements with segregated base-ducting, or mid-ducting as a further option.

Prestio60 is also compatible with the Rapido Soft-wiring and Data system and integrated power poles or blade walls can be fitted to carry services discreetly to the ceiling or floor.

The screen panels have a load-bearing top and optional mid rail enabling them to support work-tops and a range of coordinated accessories that includes shelves, document trays, whiteboards and hampers.
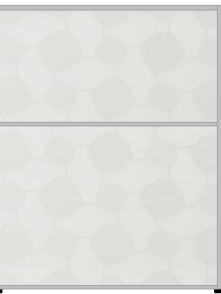

The Prestio60/32 screen system can be manufactured to incorporate your exact requirements and can be finished in a host of materials including fabric, metal, timber and Ecopanel.

Glass or acrylic panels and function rails are further options.

2700mm	1500mm
Optional	Optional

Height Options…

Prestio60 screens can be specified in a range of heights to balance privacy and acoustics with staff interaction.

Lower screens (up to 1200mm) generally provide a very open plan environment and allow full visual interaction between seated operators.

Mid-range screens (1500mm) offer increased privacy and acoustics Visual interaction is possible between standing but not seated personnel.

Higher screens (1800mm and over) provide total visual privacy from even standing personnel whilst also affording the highest noise acoustic levels…ideal for call-centres..

Glazed panels offer a more open feel whilst still providing some acoustic barrier…

1200 / 1500mm

1800mm

No Ducting   Base Ducting   Desk Height   Mid Ducting   Glazing
