## QUALITY MANAGEMENT SYSTEM

At Interia Systems, the quality and safety of our products is our highest priority. As a company, we've been dedicated to stringent quality control measures since inception in 1984 and we operate within an established and proven QMS (Quality management system).

The **Interia Systems QMS** outlines company policies and procedures and has structured and audited systems to ensure consistency and enable full traceability of products, processes and materials within the products both prior to and after delivery. This QMS is currently awaiting official **ISO 9001** certification.

Our products are manufactured from premium high-grade materials and components sourced from reputable suppliers both locally and around the world. Highly-skilled personnel utilise advanced software, technology and machinery to perform the manufacturing processes. All products are covered by a comprehensive warranty and many carry external certification to international standards such as ANSI/BIFMA, SGS and AFRDI.

**Interia Systems'** delivery and installation teams also operate within the above **QMS**. All are trained to the highest standards, which includes health and safety procedures and are equipped with the latest tools and equipment.

A company commitment to regular and on-going training, both internal and external, ensures all personnel are kept at the forefront of the industry.
