

HYDRA

DESKS & WORKSTATIONS

Interia

DESCRIPTION

The HYDRA range is an eye-catching solution which is almost limitless in its configuration options.

The subtle rounded styling is completely unique in the market and is perfect for the workspace that seeks to differentiate itself from the bland styling most offices subscribe to.

FEATURES:

- Easy to assemble and disassemble - “metal to metal” construction
- Just one tool for assembling
- All electrical components are easier to install before mounting tabletops

MODULAR CABINET SYSTEM

Desk-height cabinets with cut-outs for wire management:

- Creating a space ensuring fully open contact between employees.

Single-height shelf units for placement on cabinets:

- A clear vertical delineation of the space and separation of individual workplaces.
- Allowing employees to maintain eye contact and encouraging interaction and cooperation.

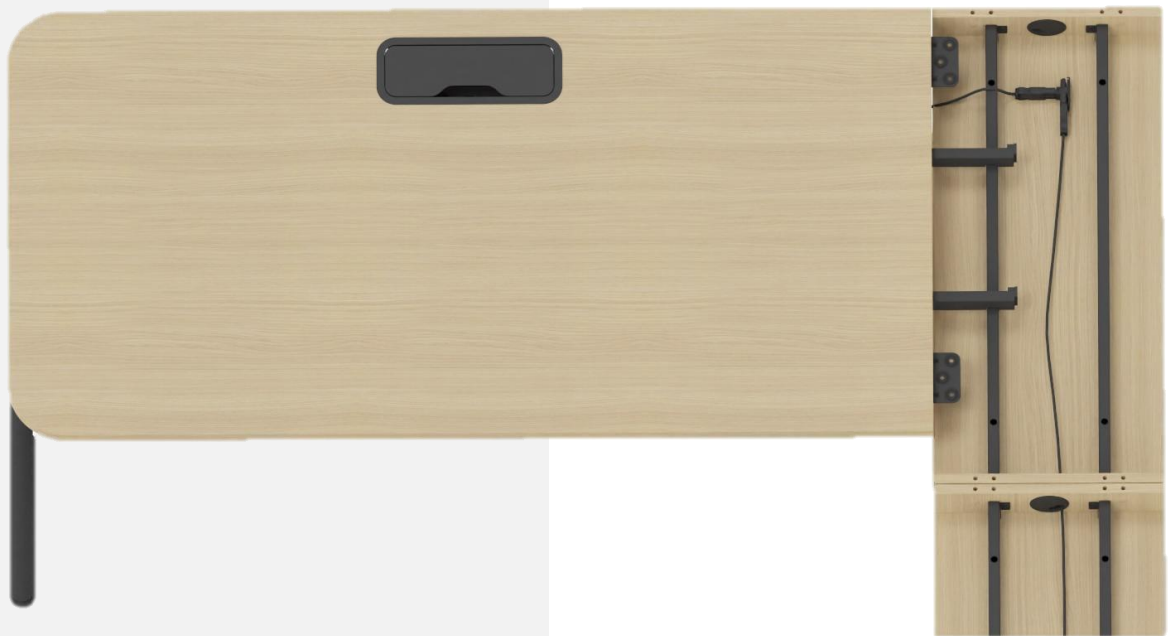

Two-height shelf units for placement on cabinets:

- Clear delineation of an employee or team space.
- Ensuring visual privacy for employees while they are sitting.
- Promoting greater concentration on individual tasks at hand.

POWER MANAGEMENT SOLUTIONS

With a wide range of applications.

Cabinets serve an important function in power supply and data transmission as they come with a grommet for wire and cable management.

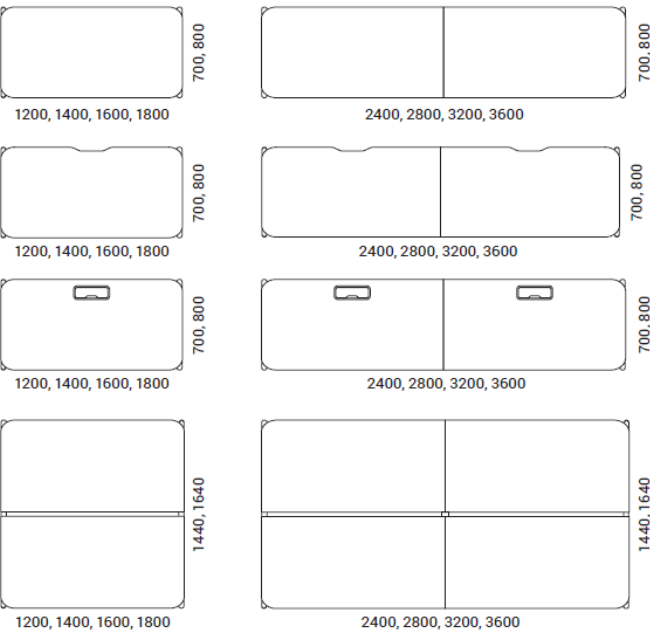

The system provides an easy path for electricity to reach the workstation from the cabinet via a cable tray for wire management under the desktop.

This also helps to maintain your workplace tidy and well-organised with the wires and cables kept smartly hidden under the desktop or in the cabinet.
