DESIGNER

Martin Ballendat

"I love the WithME chair so much because it really verifies the designer's rule: Less is more! The entire model consists of only three components which together merge in a mechanical system with the advantage of a light, transparent, reduced construction. Uniqueness of the chair is also manifested in very clear, consistent line and the net-like backrest perforation which is both breathable and flexible."

FULL ERGONOMICS

With ME leans forward-backward with an angle of 24°.

Backrest can be locked in the upright position though remember that healthier is to keep it unlocked.

PRODUCT

FEATURES

- Flexible yet strong structure to ensure healthy dynamic sitting
- Contoured backrest to support the spine, especially in its lumbar part
- Perforated, net-like backrest for pleasant air flow
- Seat upholstery fixed with a string to be easily taken off and washed
- Key components made of flexible synthetic material that is both nice in touch and washable
- Removable upholstered backrest pad for quick adapting the chair to user's wish and season
