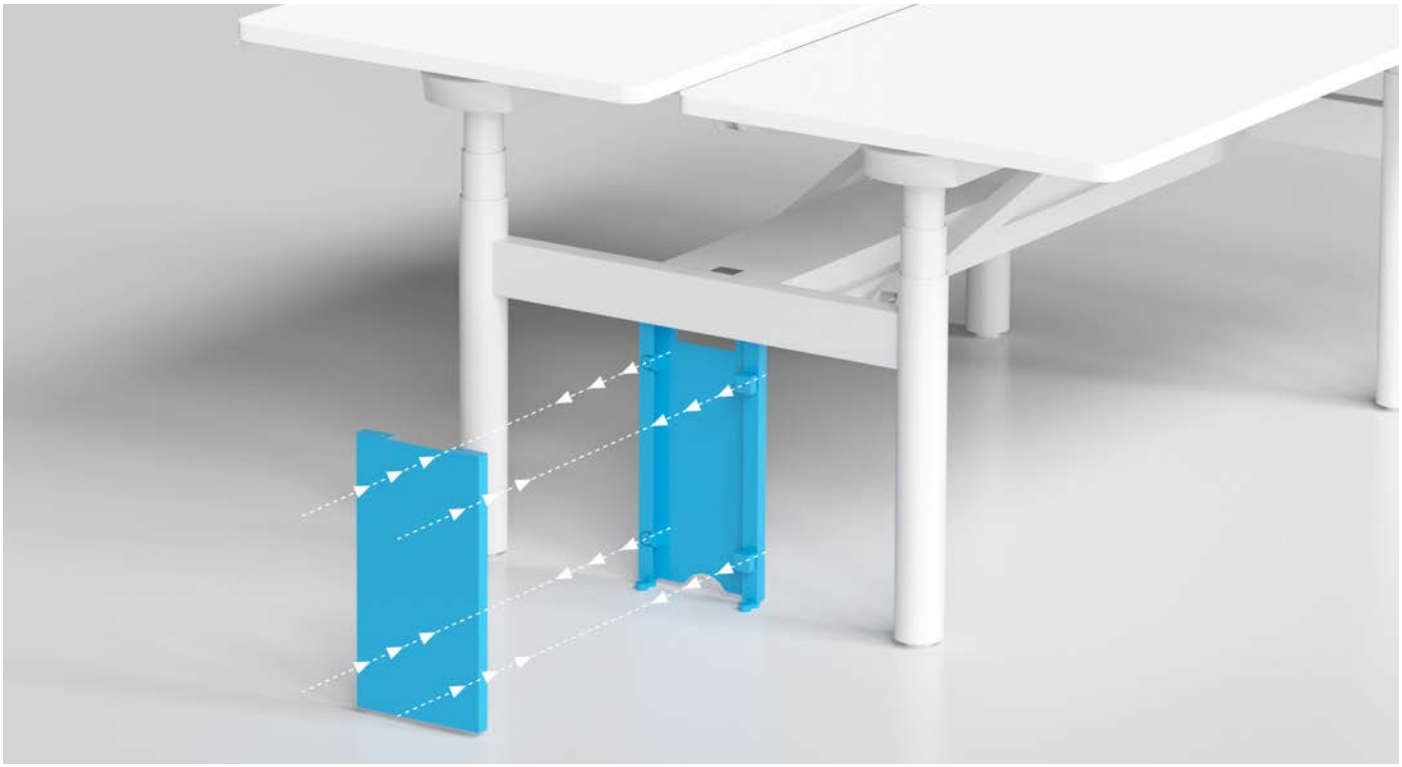
Table Top

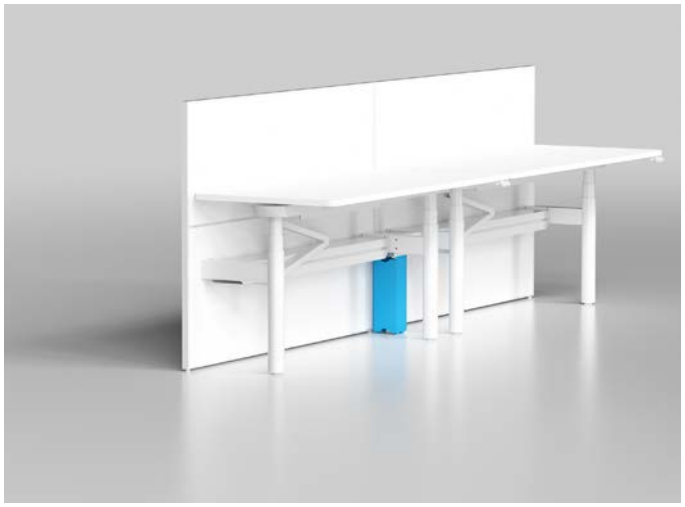
Jute's unique design eliminated the need for cable grommets on the desk, increasing the usable suface area prooviding more convenient access to power, a larger workspace and a more pleasant experience.

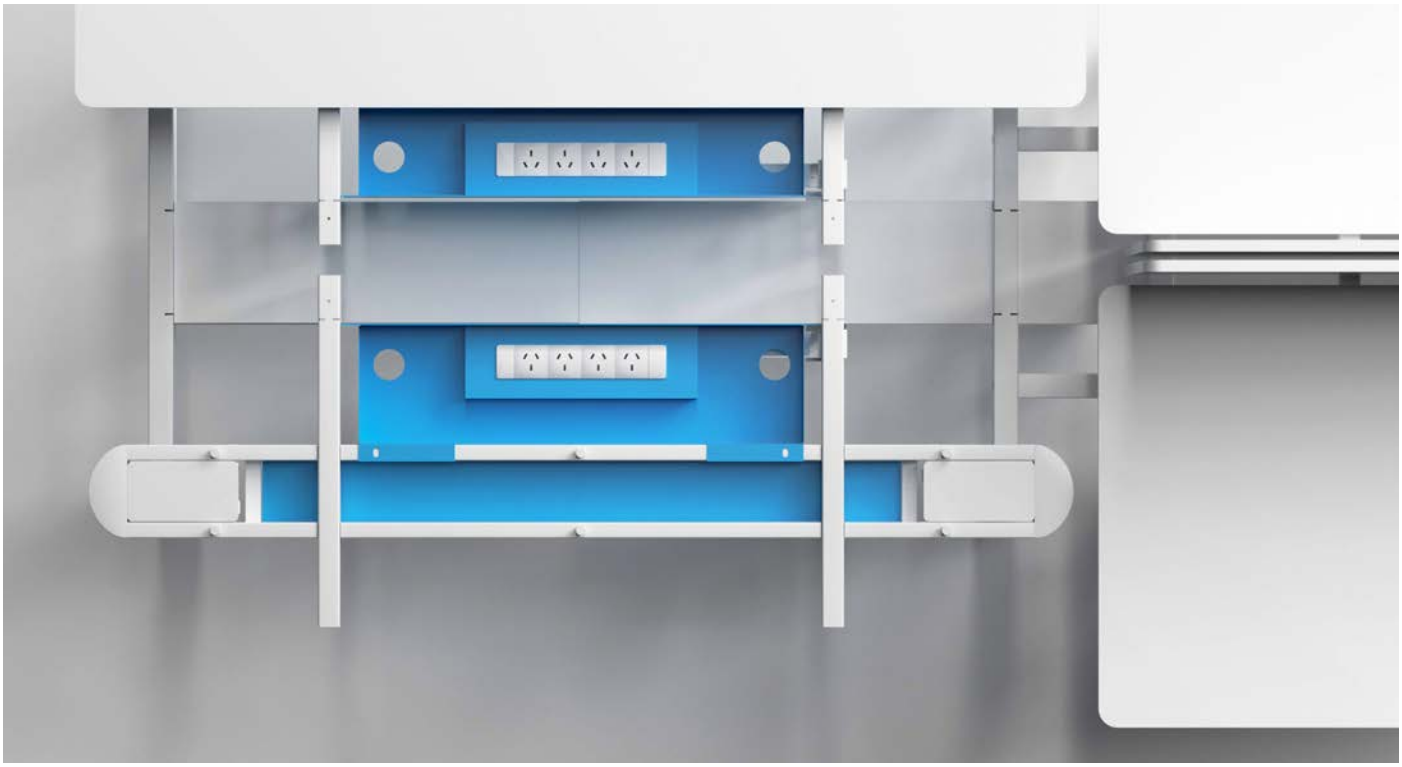
Jute offers a 150mm tabletop sliding stroke, increasing the tabletop area without changing its size, while maintaining reliable stability.

Cable Management

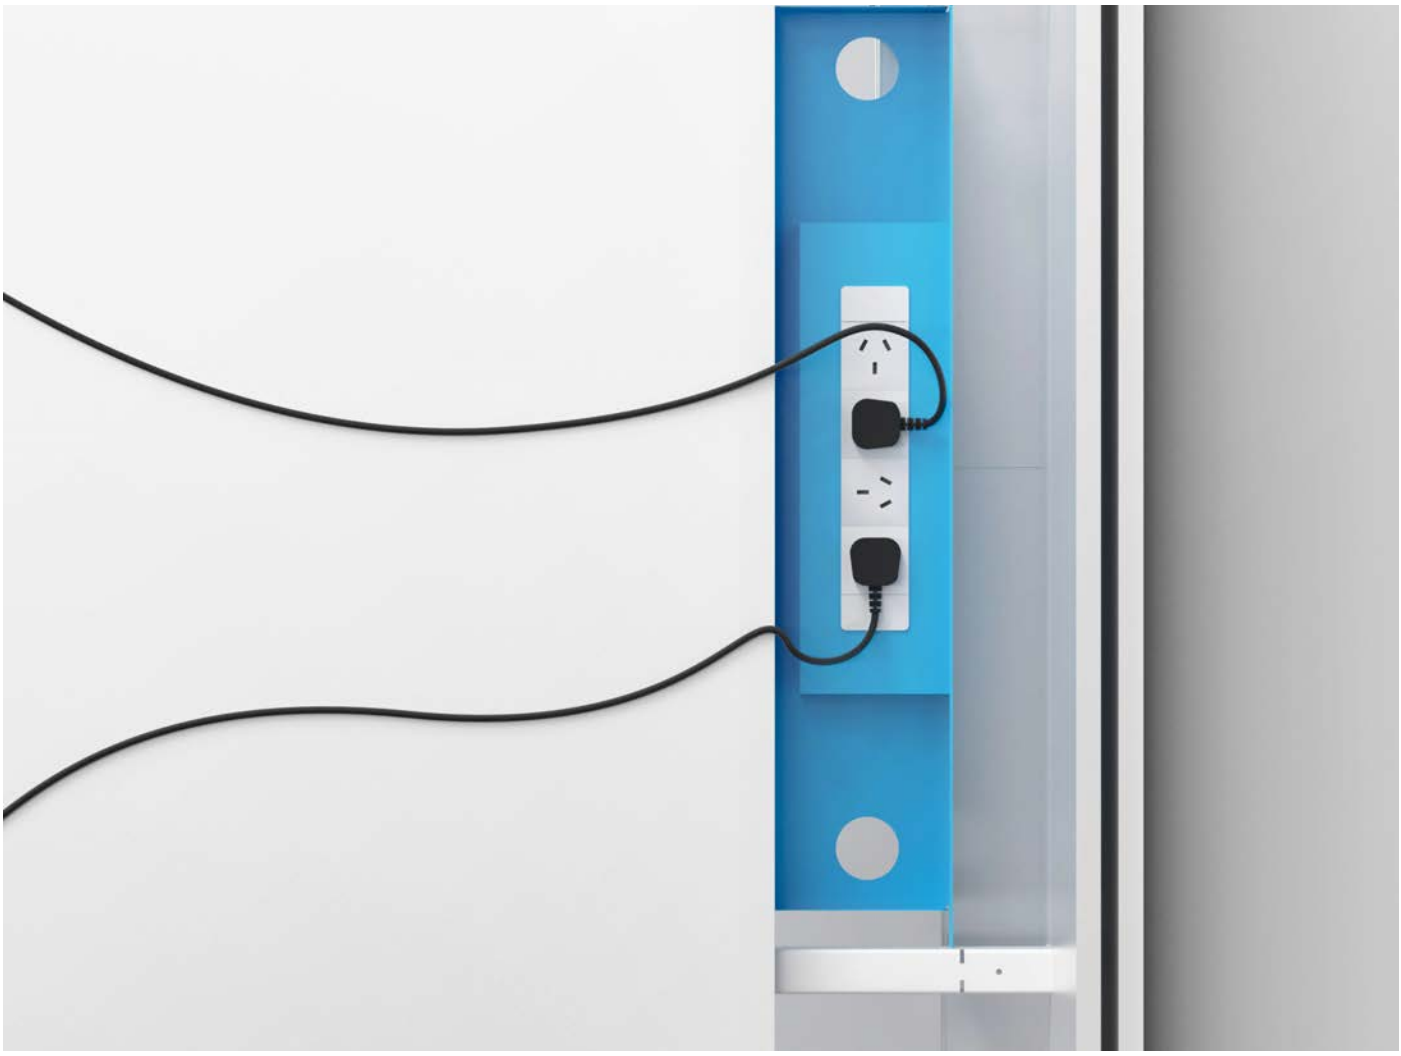


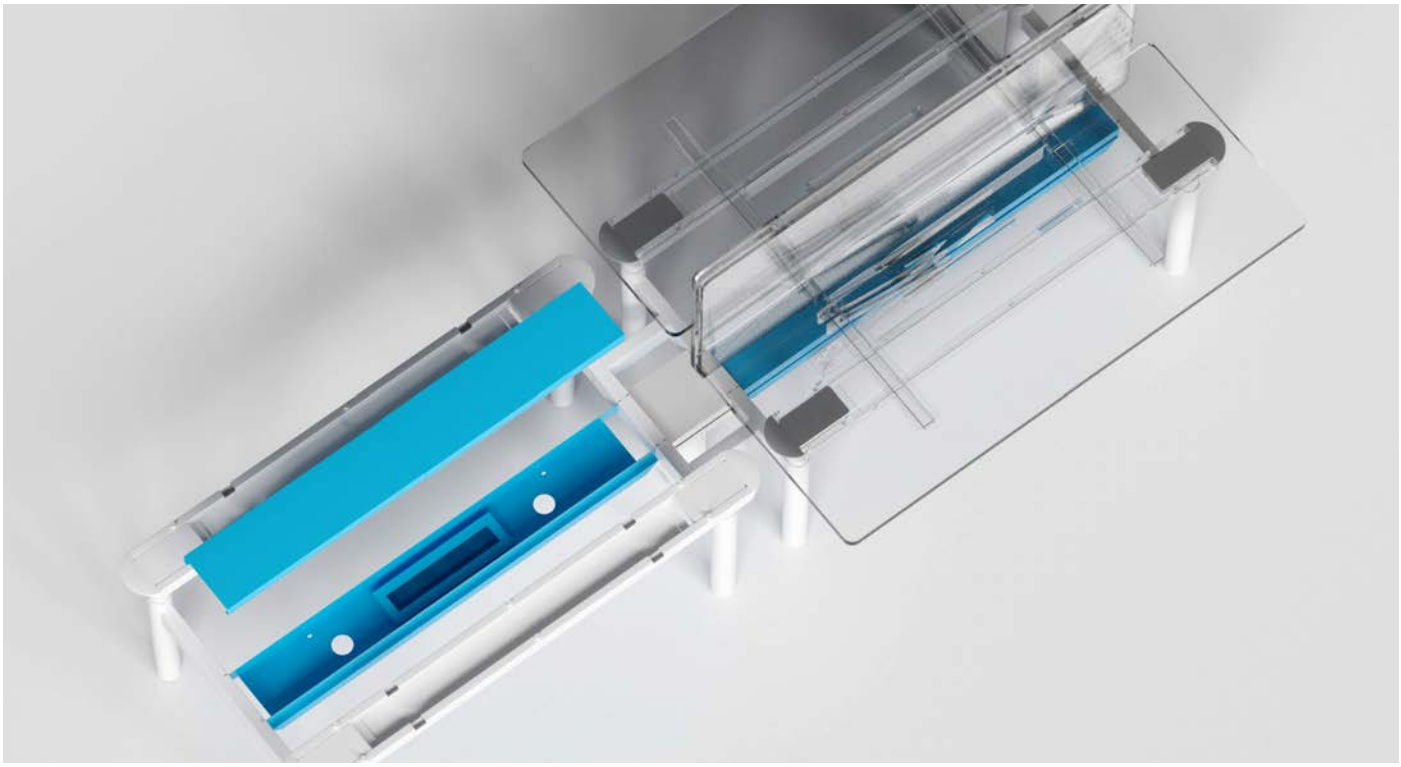
Made from powder-coated metal, featuring a magnetic closure for easy assembly and disassembly. Available in various table configurations with corresponding sizes.



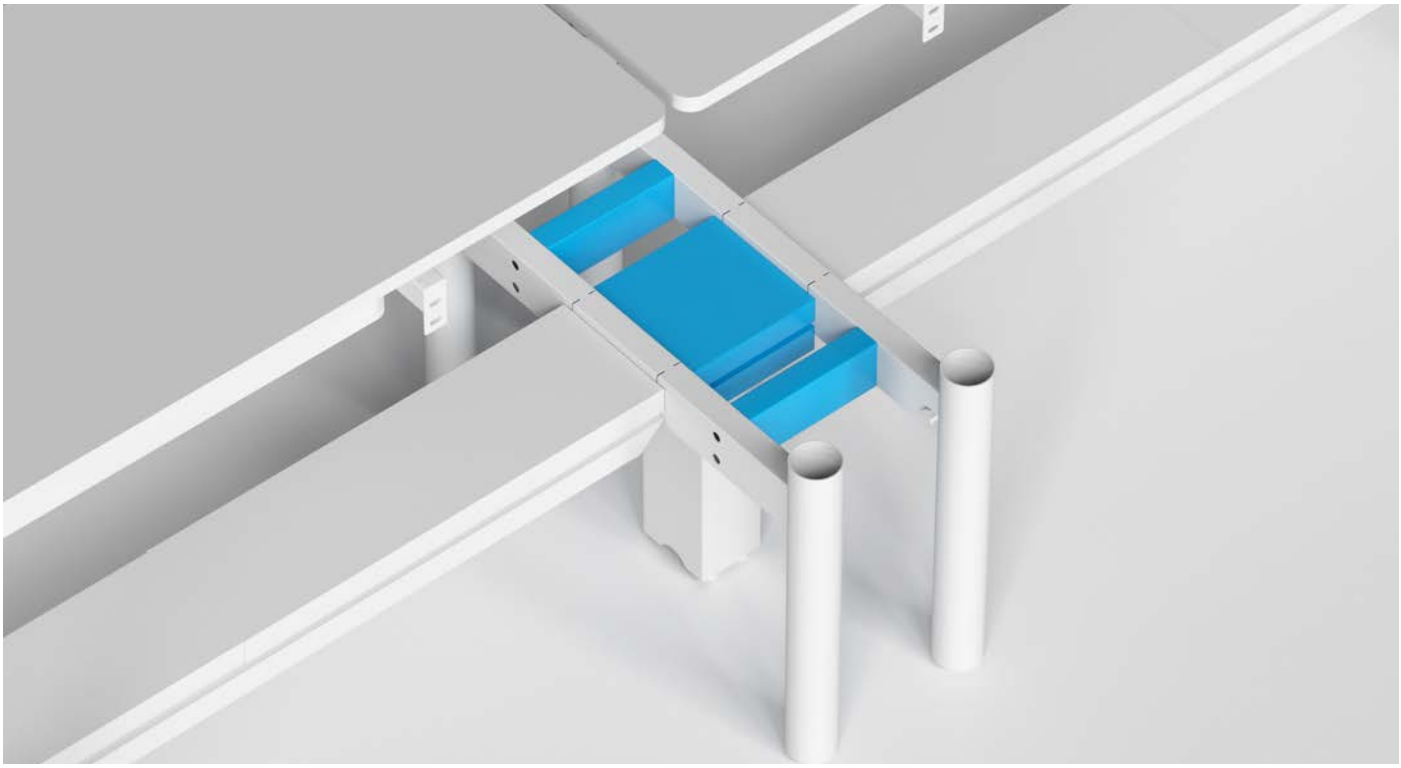


The under-desk cable tray is a modular solution designed to be fixed onto the frame rather than the traditional method of attaching it to the worktop. It provides a dedicated space for integrated power sockets and control boxes. This design makes installation and maintenance easy.

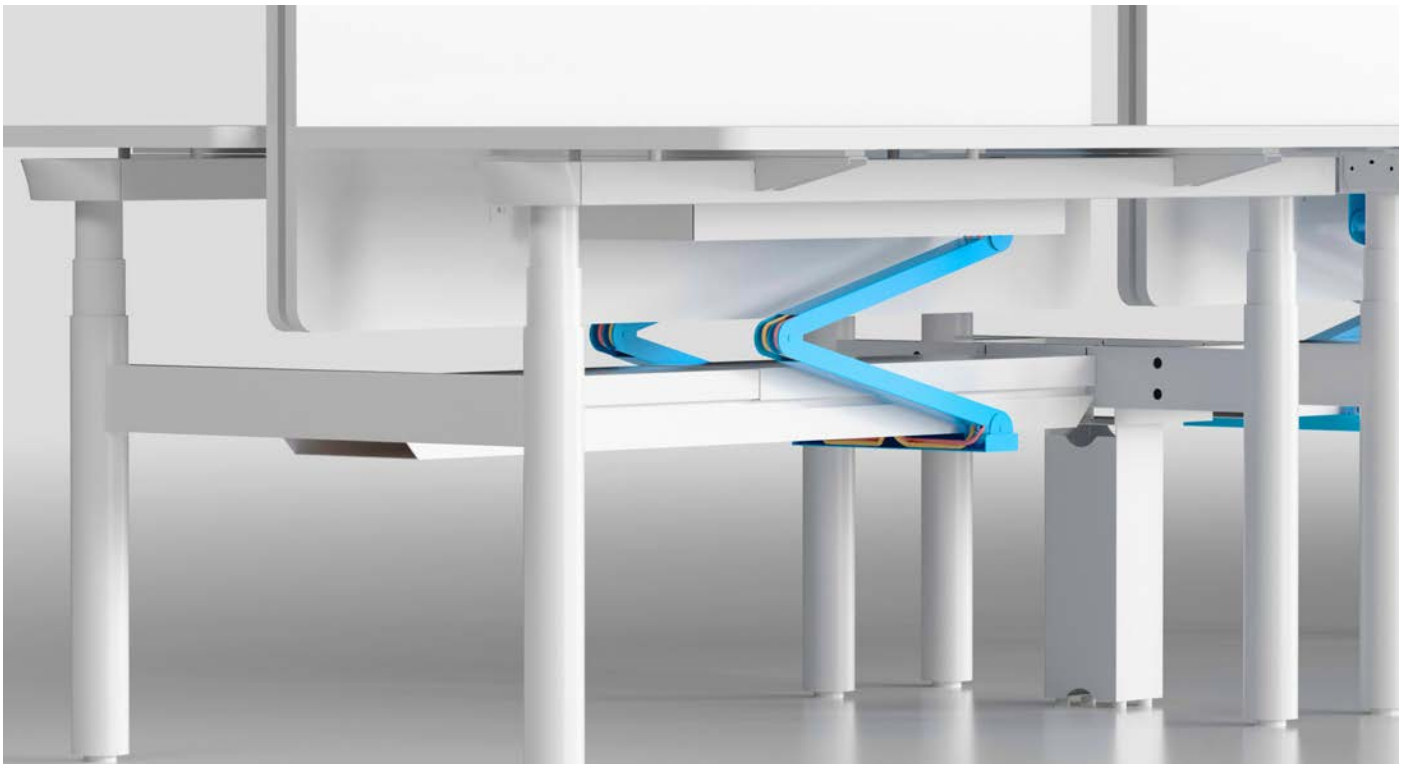




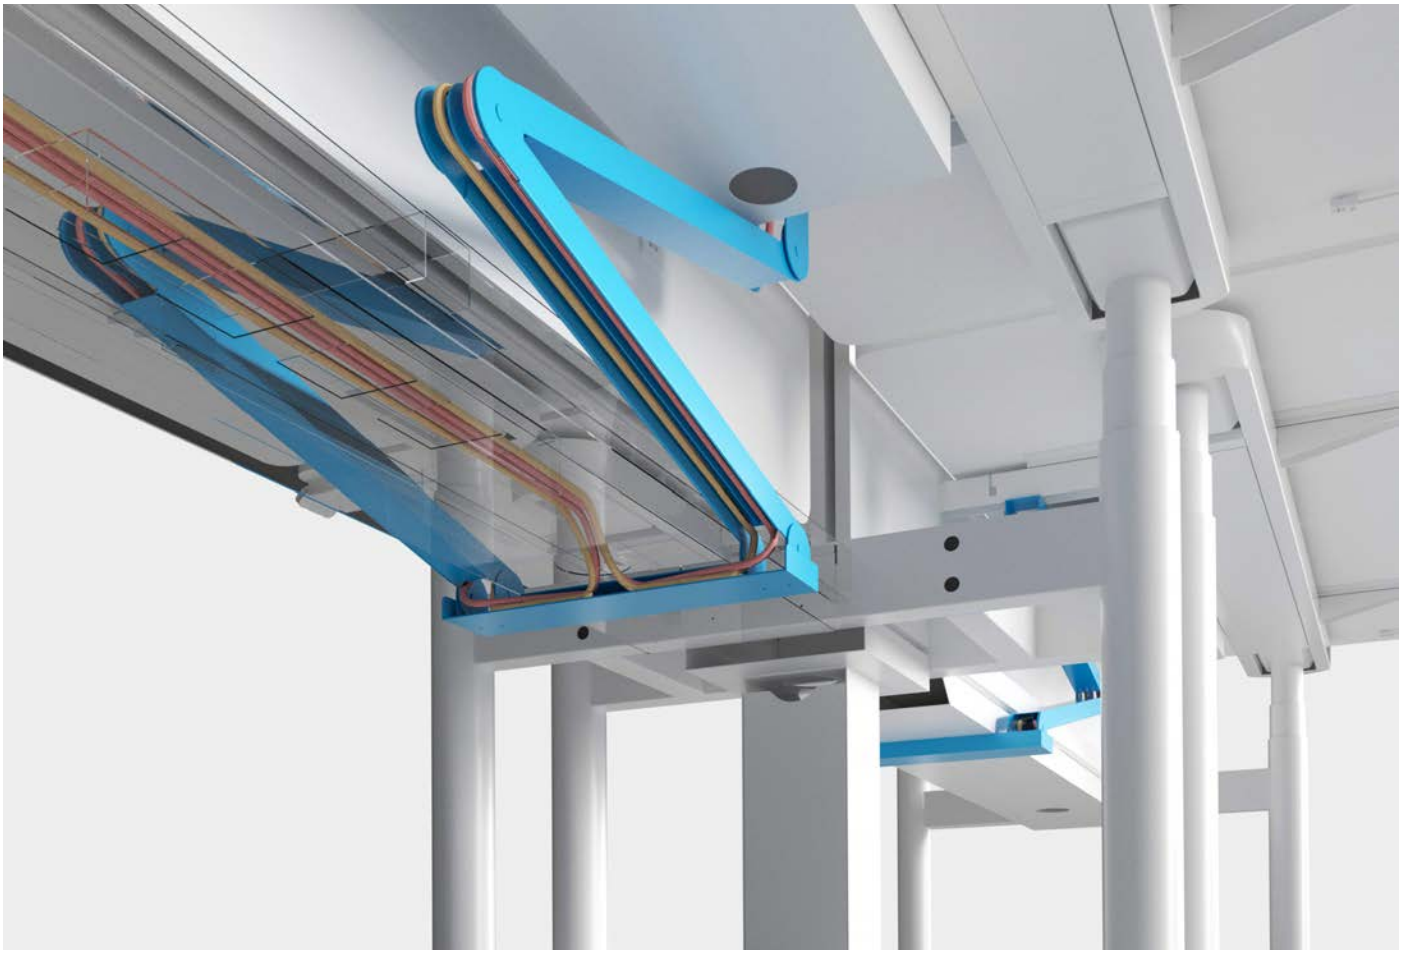
Hanging cable tray for convenient access, featuring an angled bottom for easier cable entry. The removable top provides extra space and helps prevent cable overlap.



Enclosed cable tray positioned between back-to-back workstations for enhanced safety.



Highly engineered design for easy installation and minimal noise during lifting. The bionic design enhances wire management efficiency.



A movable cover allows for easy wire management and maintenance.

Accessoriess

This workspace is designed to enhance efficiency, providing ample room for seamless multitasking and helping to keep tasks organized. With the added flexibility of incorporating a CPU holder, monitor arm, or various other accessories, it promotes a more ergonomic and comfortable working posture.

Lighting

- Dimmable 4000k lighting
- Concealed input outlets

Bookstand

- Functional integrated
- Different sizes available

Monitor Arm

- 360° rotation
- Single/dual screen options

Decorative Side Leg

Create the privacy between the workstations by using the magnetic side panel in metal or coordinated laminate finish.

CPU Holder

The ventilation hole serves a dual purpose—it helps cool the CPU during operation while also acting as a design feature for hanging accessories.

For those using a laptop, there is an option to add a hanging drawer, available in either wood or metal finishes.
